

ALL-NEW ISUZU
D-MAX
INTO NEW HEIGHTS

Welcome to the future of tough. From trademark durability to powerful performance, the all-new ISUZU D-MAX is more capable than ever before.

Featuring leading-edge safety, updated infotainment technology and all-day comfort, it's the result of a century of ISUZU's experience creating the world's finest commercial vehicles.

Redesigned from the ground up, the next-generation D-MAX is always ready and willing. With its wide stance and muscular design, it's as stylish as it is strong. New Bi-LED headlamps light the way, while sporty alloys and improved aerodynamics offer practicality and purpose. Whether on-road or off-road, at work or at play, the D-MAX redefines reliability – today, and every day after.

The all-new ISUZU D-MAX.
Into New Heights.

GET THE JOB DONE

NEXT GENERATION TOUGH

The all-new D-MAX meets every challenge. New suspension minimizes body roll while maintaining payload, as well as improving ride comfort. A choice of manual or automatic – each in six-speed – puts you in complete control, whatever your preference.

With outstanding performance and durability, the D-MAX comes alive off-road. A range of under-body armor provides maximum protection from rocks, knocks and hidden scrapes, while wading depth is increased to 800mm. In tight spaces, a turning radius of just 6.25 meters makes it easy to steer around obstacles – or, once you are finished, to turn around and do it all again.

Wherever you are planning to go, your D-MAX is up for the task.

- A Bi-LED headlamps with integrated daytime running lights*:** Illuminate further and wider for maximum visibility.
- B Integrated Rear bumper:** The two-step bumper offers protection and a step to access payload cargo, with a new, one-piece design and more dynamic appearance.
- C Tail lamps:** Newly designed rear combination lamps with double LED lights provide improved visibility and safety.

*for LS-E variant only

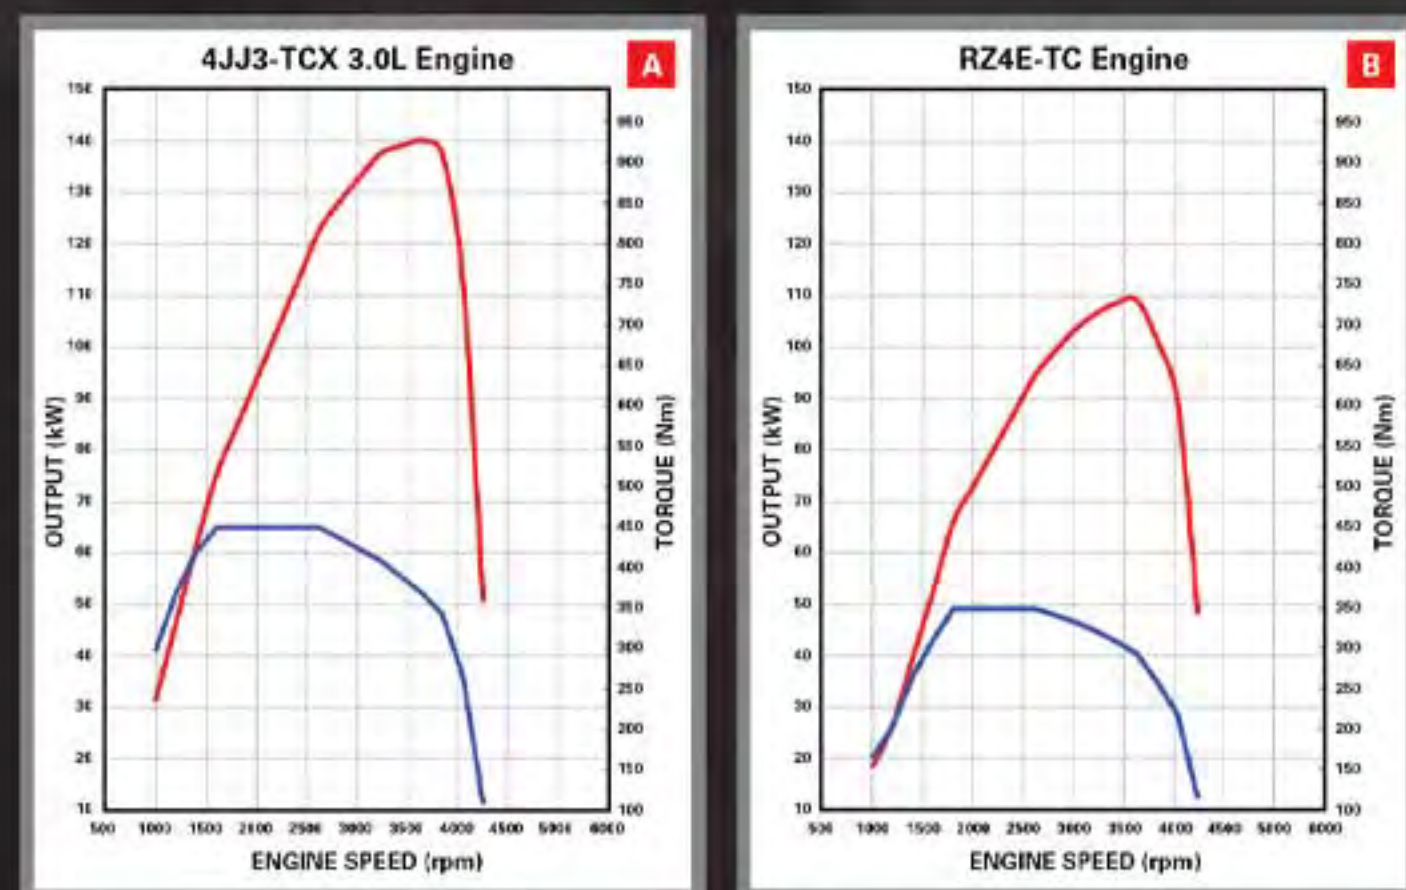

- D Water Wading Depth:** Drive through water as deep as 800 mm.
- E 4x4 angles:** Improved approach, departure and ramp-over angles for even greater off-road capability.
- F Rear cargo:** Spacious and practical, with wide, flat loading area.
- G Chassis:** Bigger and stronger, with greater torsional and longitudinal rigidity for improved handling, stability and durability.

THE POWER TO PERFORM

As one of the most reliable automotive company since 1916, ISUZU has remained the world leader in diesel engineering having built over 27 million engines internationally. Combining responsive low-end torque with the power to get things done, the all-new D-MAX inspires confidence on every journey.

Both rugged and refined, its legendarily reliable engine is built to work. It delivers uncompromising performance while meeting the latest emissions standards - even as it improves on efficiency and economy. With the boosted turbocharger response, precise fuel injection control and low engine noise, the all-new D-MAX is more accomplished than ever.

A ISUZU 4JJ3-TCX Diesel Engine Performance:
Max.Power 140kW (190PS) / Max.Torque 450 N.m

B ISUZU RZ4E Diesel Engine Performance:
Max.Power 110kW (150PS) / Max.Torque 350 N.m

C Engine: Robust and refined reinforcing ISUZU's reputation for diesel durability.

D Electric Control VGS Turbocharger: Reduced lag, more power.

E Combustion chamber: Optimized combustion chamber minimizes emissions while boosting fuel economy.

GO HARD. GO HOME. REPEAT.

*for 4JJ3-TCX engine only

Outstanding reliability is part of ISUZU's DNA of truck. The all-new D-MAX continues a tradition of toughness that began with the ISUZU's first ever pickup in 1963. Higher, wider and stronger than ever, the new model underwent the equivalent of over four million kilometers of testing during research and development, both on-road and off-road. It emerged as the toughest pickup in ISUZU's history.

The new D-MAX's lightweight body belies improvements in occupant protection, noise and vibration, as well as in overall stability. It is engineered for easy maintenance, with rock-solid rust protection and multiple maintenance-free components.

A Double scissors idler gear*: Reduced gear noise and vibration.

B Timing Chain: With auto tensioner minimizes wear.

C Melt-in liner: The D-MAX's advanced anti-friction induction hardening process greatly strengthening the cylinders.

YOUR HOME ON THE ROAD

Comfortable, easy to use and flexible, the D-MAX is more than just a pickup. It is your mobile office, your place to relax, and your passport to adventure.

ISUZU's universal design concept means that every feature is tailored to you. There is a well-appointed, spacious cabin, easy entry and exit, and impressive new interior design. A redesigned seat - electrically adjustable in eight different ways - lets you find the perfect driving position, along with tilt and telescopic adjustment of the steering wheel. Every seat has softer cushioning and firmer lateral support, while abundant storage options fall easily to hand, whether you are in front or back. Dual-zone climate controlled air conditioning, reduced cabin noise and minimal vibration make every journey a pleasure.

Whether you are with the family or on the job, the all-new D-MAX is one step ahead. This is the next evolution of ISUZU.

A Steering wheel: Sporty and ergonomic, with tilt and telescopic adjustment for the perfect driving position.

B Rear console with air-conditioning vent: Comfort of dedicated air-conditioning vents to back-seat passengers.

C Storage: Every door has space for a 1.5L bottle.

D Dual-zone climate control*: The driver and front-seat passenger can set individual temperatures to suit their personal preference.

E Leather-appointed seat*: Ergonomically designed, with anti-vibration elastic comfort foam and an eight-way adjustable driver's position.

F Large 4.2" TFT Multi-Information Display: Shows various vehicle functions according to the driver's preference.

G 10.1" Infotainment with Apple CarPlay™ and Android Auto™: Replicates the functions of your smartphone while driving, including voice recognition.

H Multiple USB ports: Easy access to both front and rear occupants for mobile charging.

YOU'RE IN SAFE HANDS

There is nothing more important than the well-being of you and your family. That is why the all-new D-MAX is built for maximum peace of mind. It includes a range of safety features that operate automatically and independently, working to resolve dangerous situations - usually before the driver is even aware they are in trouble. Additional Smart 3D DUO Camera that has superior ability to detect obstacles, made it possible for D-MAX to have advance safety features.

The advance Smart 3D Camera that is unique to D-MAX in this class. It constantly maps the surrounding area to measure distance of every obstacle on the road. Since it uses a dual camera setup, it can detect 3D objects just like how human eyes recognizes the depth of field. It can even detect pedestrians under complicated situations which works correctly under real world conditions. Pedestrian Protection minimizes harm to those outside the car in the event of a collision.

The body of the new D-MAX is strengthened to better protect you and your family from external impact from any angle. Larger brakes front and rear increase stopping power - the better to prevent accidents in the first place - while the seats are designed to absorb impact during an emergency. The doors of the pickup unlock automatically in any cases that the airbags are deployed.

The D-MAX is not only good at keeping you safe, but also those that are around you. Now you can safely drive with extra confidence in difficult circumstances, whether on-road or off-road, daytime or night-time. Because confidence is more than just conquering the toughest terrain. It is about knowing you are in the safest of hands - on every journey.

SMART
DUO CAM

A Adaptive Cruise Control: Automatically controls D-MAX speed using vehicle-to-vehicle distance control within the pre-set speed range

B Autonomous Emergency Braking: If the system determines a collision is unavoidable, it applies emergency braking

C Lane Departure Warning: System warns the driver when the vehicle is about to drift off the road

D Turn Assist: When turning and crossing the path of ongoing vehicle, and system determines a collision is unavoidable, the system applies emergency braking

E Automatic High Beam: At night, intelligent camera detects incoming vehicles and tail lights of preceding vehicles to automatically adjust the headlights

F Parking Aid: System uses ultrasonic sensors to detect objects around the vehicle

G Blind Spot Monitoring: When the system detects vehicle in the detection area, the indicators come on.

for LS-E variant only

ADAS
ADVANCED DRIVER ASSIST SYSTEM

ADAS features are designed to assist the driver, but should not be relied upon nor used as a substitute for safe driving practices. Feature operation may vary in different driving conditions. For full explanation of limitations, see Owner's & Driver's Manual.

BUILT FOR BUSINESS

Built on our heavy-duty ladder type chassis and running on our tried & tested Isuzu diesel engine, our vehicles are designed to withstand the test of time. Capable to operate for a long period time and in different weather conditions, Isuzu vehicles boasts large cargo capacity, easy maintenance and a wide range of body applications to choose from.

Both our Light Commercial Vehicle and Truck line-up are engineered towards durability, reliability and fuel economy. With an extensive model line -up to choose from, we are confident that there is an Isuzu model to suit your business needs.

As an Isuzu owner, we make sure to maintain a long-term partnership with you. You can be assured of our fast and quality after sales service in any of our authorized service facility nationwide. Parts availability and roadside assistance are also not problem, due to our efficient warehousing and logistics system, coupled with our Mobile Medic servicing team which can get to you even on those far flung areas.

For fleet owners, we conduct a special drivers and mechanics training on different topics such as Eco-Driving, Safety Driving, and Proper Truck Operation & Inspection. Our expert Japanese truck engineers are also within call to assist you on your special body requirements and specifications.

A Reinforced cabin: Fabricated with High Tensile Steel for outstanding strength and rigidity to create a passenger safety cell.

B Bigger brakes: Significantly reduced brake noise, significantly improved service life and brake feel.
